

Welcome to Seoul and to the 4th AOCNHNR.

On behalf of the organizing committee, we would like to extend our sincere and cordial welcome to all the distinguished delegates and their family.

The local organizing committee have made an effort to offer the high standard of scientific programs and exciting social activities. The scientific programs are mainly focused on the educational and instructive lectures from the prestigious international speakers, comprising refresher courses, special lectures, and luncheon lectures, and symposia. Also are included free communications (both oral presentation and scientific exhibition) covering the current radiological practice and research of the brain, the head and neck, and the spine. As the social programs, opening reception, joint banquet with WFITN, and congress tour are provided. Various optional tour programs are also arranged.

As you are aware, this AOCNHNR meeting is held in conjunction with the 6th WFITN so that many participants can enjoy both meetings. This AOCNHNR meeting will surely be a memorable occasion not only for exchanging scientific knowledge and ideas in the field of neuroradiology and head & neck radiology, but also for promoting the friendship among the participants from all over the world, particularly from the Asian and Oceanian regions.

We hope and believe all of you enjoy this AOCNHNR 2001 Seoul through the scientific and social programs, our traditional culture, and the historical heritages in Korea.

Jung Ho Suh, M.D.
Congress Chair

Kee-Hyun Chang, M.D.
Organizing Committee Chair
